## Education

### Higher Secondary Education

Liverpool International College, Ktm  
2016-2018

Course: Science major

### Bachelor of Information Technology

College of Information technology  
and Engineering, Ktm

2018-present

Course: Information Technology  
Currently in 8th Semester

## About Me

I am a hardworking and dedicated individual with a strong passion for becoming a full-stack developer specializing in the MERN tech stack. I thrive on the creative challenges of front-end development and the technical complexities of back-end work. My goal is to continuously expand my skills and gather new ideas from job experiences to propel my career forward. I am excited to utilize my expertise in the MERN stack to create exceptional web applications and make a meaningful impact in the field of software development. I am eager to seize every opportunity for learning and growth along the way.

## Projects

### Movie360

Technology Used: HTML, CSS, JS

Description: A movie information website that shows popular and trending movies, and also has search feature to search for any movie. It also allows user to view the trailer and read the synopsis.

This project taught me the concept of DOM manipulation, JS basics, ES6 concept and handling async operation in JS.

### Recipe360

Technology Used: ReactJS, Tailwind CSS, RestAPI from themeadb.org

Description: A completely responsive website that shows recipe of any food searched, and shows instruction to prepare it as well.

It helped me practice ReactJS, mapping of the data and handling the API response.

### Weather360

Technology Used: ReactJS, Tailwind CSS, RestAPI from openweatherAPI

Description: A ReactJS based weather information showing application that shows weather information, hourly and weekly forecast of any location searched.

It helped me to practice about contextAPI in ReactJS, object mapping and responsive design using tailwind css.

### MERN Crud APP

Technology Used: MERN Stack, RestAPI, Postman

Description: This project showcases the basic crud operation using the MERN tech stack. It allows to create, display, update and delete the records from the mongoDB database.

This project helped me practice the backend using node, express and noSQL database mongoDB. This application also taught me to use the Postman API testing tool.

## Skills

- HTML, CSS, JS
- Bootstrap
- Tailwind CSS
- ReactJS
- MongoDB
- NodeJS
- ExpressJS
- RestAPI
- Postman

## Soft Skills

- Communication
- Punctuality
- Goal Oriented
- Team Player
- Motivated
